

# VOTER REGISTRATION

ELECTION  
SECURITY

1

A Salt Lake County resident registers to vote either online or using a paper form.

2

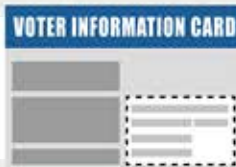

Their identity is verified through the State of Utah using the last four digits of their social security number, their Utah driver license number, or a state ID card number.

3

A record is created for the voter in Utah's statewide voter registration database.

4

A Voter Information Card (VIC) with the voter's precinct and district information is mailed to the voter.

## MAINTAINING ACCURATE VOTER ROLLS

Election staff review all returned mail to verify the accuracy of voters' addresses and voter status.

The National Change of Address (NCOA) database is used to update voter addresses.

Deceased persons are regularly removed based on a list provided by the Office of Vital Records.

Notifications from other states identify voters who have moved out-of-state.

Address changes made with the Utah Driver License Division (DLD) are automatically applied.

The database is scanned regularly to remove duplicate entries and ensure accuracy.

Voters are encouraged to contact the Election Division when they move.
